

Estuary and Salmon Restoration Program

2025-2027 Prioritized Investment Plan

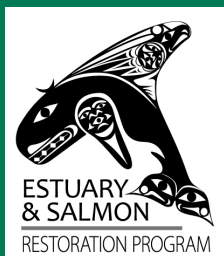

ESRP's \$27.5 Million Request will:

Restore 324 acres of
nearshore habitat.

Remove 0.7 miles of
shoreline armor.

Acquire & Protect 529
acres of nearshore
habitat.

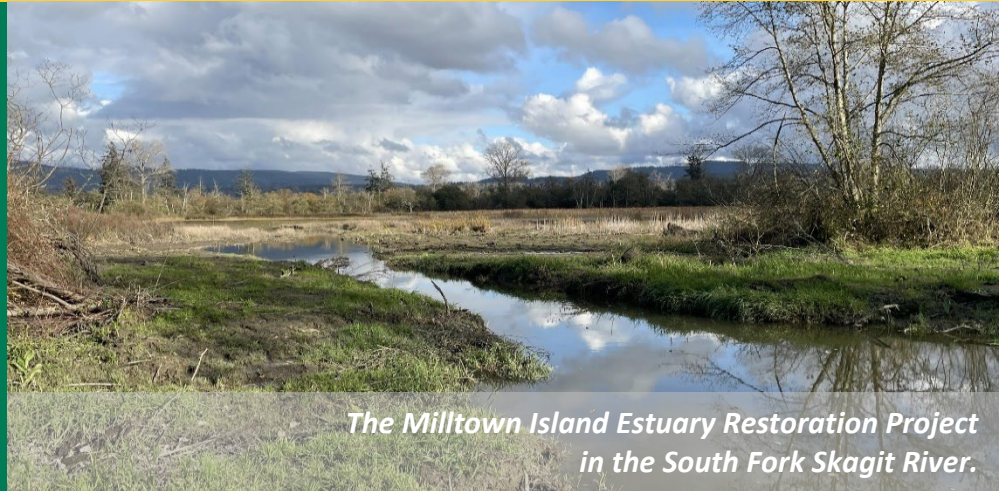

Design and Plan for
135,978 acres of future
habitat restoration.

Supporting Puget Sound & Salmon Recovery

Since 2006, the [Estuary and Salmon Restoration Program \(ESRP\)](#) has provided capital funding and technical assistance to organizations working to restore critical shoreline and nearshore habitats. Our strategic approach supports recovery for all species – from tiny forage fish to the iconic salmon and Southern Resident killer whales – by restoring resilient and sustainable habitats that benefit us all. [ESRP was ranked the No. 1 overall priority in the Puget Sound Partnership's 2025-2027 legislative priority list.](#)

ESRP funds all phases of restoration through four competitive grant programs:

Estuary and Salmon Restoration Program

Percent of ESRP budget request by grant program

2025 Prioritized Project List

ESRP administers a Sound-wide competitive technical review and evaluation for each of the four grant programs, then combines the results to create a single prioritized project list, the [2025-2027 ESRP Preliminary Investment Plan](#).

The projects proposed for the 2025-27 biennium are driven by community and regional planning efforts. This work will restore key fisheries and provide jobs across the Sound. All 31 proposed projects and 6 Shore Friendly Programs are aligned with regional salmon recovery efforts.

ESRP is administered in partnership with the Recreation and Conservation Office.

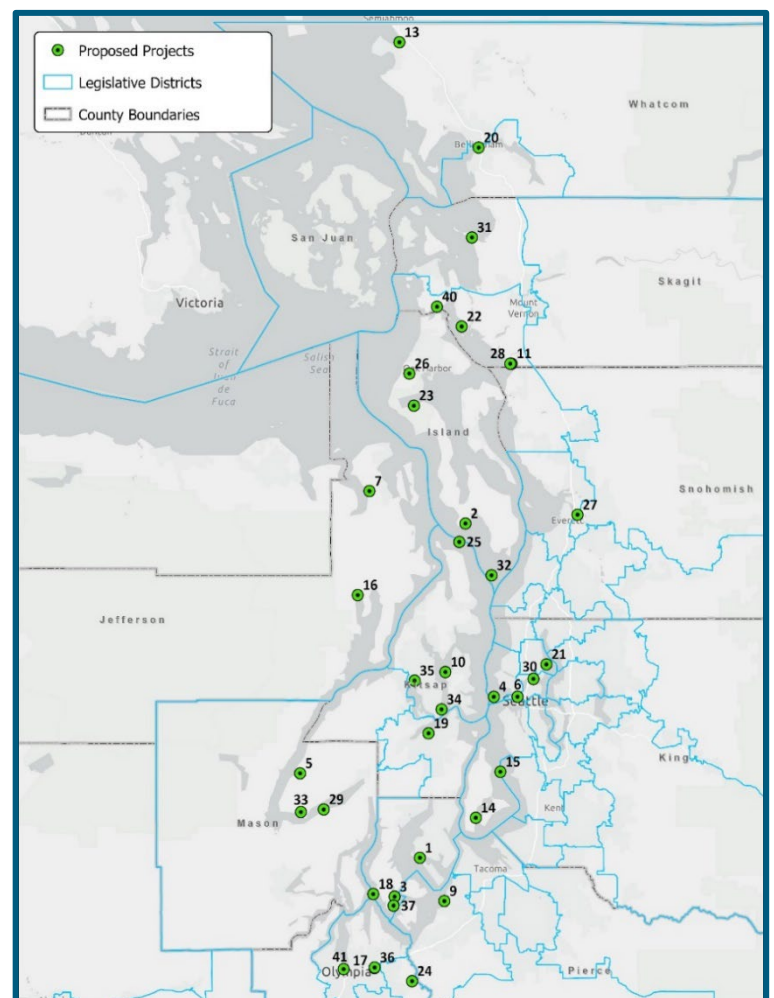

Map Note: Shore Friendly investment occurs on multiple parcels across 1,400 miles of privately owned shoreline in Puget Sound, from the Strait of Juan de Fuca to the Canadian border.

Regional Pre-Design projects are assigned a point based on the project sponsor's office, as many projects are Puget Sound-wide in scope.

Removing Armor with Landowner Incentives

Over a third of **Puget Sound's** shoreline is **armored**, limiting critical forage fish spawning habitat. In 2019, ESRP adopted the [Shore Friendly Program](#), which coordinates with six local leads to provide stewardship incentives to shoreline landowners, creating a pipeline of future capital habitat restoration projects. Shore Friendly has reached thousands of private shoreline landowners, resulting in miles of armor removal, prevention of unnecessary armor installation, healthier shoreline habitats, and greater resilience to coastal hazards for participating landowners.

Visit our [interactive web map](#) for full details on each proposed ESRP & Shore Friendly project for the 2025-27 biennium.

Estuary and Salmon Restoration Program

2025-2027 Preliminary Investment Plan

Rank	PRISM Number	Program-Project Type ¹	Project Name	Primary Sponsor	Program Total Includes agency administration	Cumulative	Legislative District	County
1	24-1250	Portfolio R&P-Restoration	DeMolay Sandspit Bulkhead Removal Implementation	Pierce County Conservation District	\$715,666	\$715,666	26	Pierce
2	24-1200	R&P-Acquisition	Double Bluff Acquisition	Whidbey Camano Land Trust	\$2,145,000	\$2,860,666	10	Island

Reserved funds for cost increases to identified projects					\$323,400	\$27,532,880		
Total Request						\$27,532,880		

Notes:

- This preliminary investment plan weaves together the Estuary and Salmon Restoration Program (ESRP)’s four grant program offerings: Restoration and Protection (R&P), Regional Pre-design (RPD), Small Grants, and Shore Friendly.
- The streamlined "portfolio" designation is reserved for projects that have completed feasibility design and ranked well in a previous ESRP investment plan. This designation allows high-performing project sponsors to request funding to complete the next phase of priority projects through a streamlined application process, and to be placed at the top of subsequent Estuary and Salmon Restoration Program investment plans.
- Several of the Regional Pre-design projects will result in planning guidance applicable to restoration projects in any part of Puget Sound and are denoted as “Puget Sound wide” in the “Legislative District” and “County” columns.
